

■ Initiatives for Startup Support

➤ About the Credit Guarantee Corporation of Osaka
 The Credit Guarantee Corporation of Osaka was established based on the “Credit Guarantee Association Law”. It allows small and medium-sized enterprises to be publically guaranteed when they receive financing from a financial institution. Through financial support with credit guarantees and support for founding and management, we support about 80,000 companies in Osaka Prefecture.

From the basics of starting a company, to formulating a startup plan and financing until and after the startup, our founding support allows us to support you in realizing your dreams.

■ Concerning the Main Support

➤ Fundraising Support From Credit Guarantees
 There are various guarantee systems for various funding needs. We also have several guarantee systems for companies at the time of establishment and are ready to help with raising funds.

➤ Establishment & Management Support Business
 Various seminars are held before founding and at each level of the founding stage in order to support the founders of the company. Also, in the management support business, our experts will support you with management diagnosis, advice and formulation of plans.

➤ Innovation and Investing in Establishment Support Funds
 We have invested in 3 funds as an LP: “Kansai Innovation Network Fund”, “Osaka Business Succession, Founding Support Fund” and “OSAKA Regional Growth and Founding Support Fund”. According to the type of the company being founded, business details and the technical ability of the business operators, etc., we introduce fund GPs to match with the company’s objectives whilst providing additional support for funding.
